OBJECTIVE

I am a motivated IT professional with a strong foundation in network security, system administration, and cloud technologies like AWS, GCP, Azure. Experienced in handling IT operations, Office 365, virtualization, and compliance audits. Skilled in tools like Zscaler, CrowdStrike, and Microsoft Intune. Seeking to contribute to a dynamic organization while enhancing my expertise in cybersecurity and cloud infrastructure.

TECHNICAL SKILLS

Programming and Scripting Languages: Python, Power Shell.

Frameworks & Technologies: Azure, Networks, Linux, Cybersecurity, Website Frameworks, GIT, AWS

System Administration: CentOS, Red Hat, Kali, Ubuntu, Oracle Linux, Microsoft Windows Server, VDI, OpenShift.

Soft Skills: Program Management, Leadership, Communication, Teamwork, Problem-Solving, Time Management, and Critical Thinking.

WORK EXPERIENCE

ZYCUS PVT. LTD | Mumbai, India | Executive ITIS

Present

- **Network & Security Management:** Troubleshooting network issues involving switches, access controllers, and Wi-Fi connectivity while maintaining security configurations in the Zscaler portal. Enhancing networking skills with ongoing CCNA coursework. Administering FortiGate firewall policies, Zscaler Internet Security and Private Access, and monitoring security threats with CrowdStrike Falcon. Implementing Data Loss Prevention (DLP) policies and Rights Management Services (RMS) to enhance data security.
- **Office 365 & Virtualization Administration:** Managing Microsoft Intune for endpoint security, compliance, and device management. Overseeing SharePoint configurations, permissions, and document access. Administering Microsoft Exchange for mailbox configurations and email security policies. Implementing Virtual Desktop Infrastructure (VDI) for cost optimization, configuring HA setups, and ensuring seamless user access.
- **Auditing, Compliance:** Conducting monthly access reviews, collecting evidence for compliance audits, and participating in security assessments such as SOC, IRAP, and VAPT.
- **Freelancing:** Website development, designing and building websites during free time and weekends, utilizing technical expertise to deliver high-quality web solutions.
- **IT Operations:** Managing employee onboarding and offboarding processes, including ID creation, laptop preparation, software installation, and IT asset handover. Ensuring seamless offboarding by revoking access, retrieving IT assets, and maintaining compliance across locations. Overseeing IT asset inventory, repairs, and stock management at the Bengaluru location. Handling IT operations-related tickets, including software installations, hardware issues, and Office 365 administration. Managing L1 and L2 Zscaler-related tickets, database connectivity, SSL certification issues, and vendor access while ensuring endpoint security compliance.

CERTIFICATE

- Microsoft Technology Associate: Security Fundamentals (MTA) October 2020
- Microsoft Power Virtual Agent – Udemy – Completed Feb 2023
- ChatGPT Masterclass - Build Solutions and Apps with ChatGPT – March 2024
- [AZ900: Microsoft Azure Fundamentals – Feb 2025](#)

EDUCATION

University of Mumbai, India | Bachelors of Instrumental Engineering

CGPA – 7/10

University of Mumbai, India | Diploma in Computer Technology

Passed with Distinction – 70 %.
